SUSE LINUX DESKTOP – IT'S BUSINESS AS USUAL

SuSE Linux Desktop provides a working environment that is a pleasure to use and easily mastered, especially by Windows users.

Desktop users will benefit from ongoing development of this product, designed to meet the growing requirements of different users and for various deployment scenarios.

SuSE Linux Desktop satisfies the requirement for a stable alternative desktop system which can integrate into a heterogeneous IT environment and transparently access Windows, Linux, UNIX and other servers.

Access to all relevant server systems with the SuSE Linux Desktop*.

*May require installation of additional client software.

SuSE Linux Desktop provides outstanding interoperability and can be used in parallel with Windows clients.

SuSE Linux Desktop's intuitive and user-friendly interface is the result of a continual process of testing and development by the SuSE Usability Lab.

Improvements are released immediately after testing and can be accessed online via the SuSE Maintenance Web.

COMPREHENSIVE APPLICATIONS AND FUNCTIONALITY

As an Open Source solution, SuSE Linux is ready for today's needs and adaptable for the future.

SuSE Linux Desktop provides a flexible platform that accommodates the needs of the typical office worker, including Thin Client functionality for use with legacy servers.

Naturally, this also includes secure access to Microsoft systems, Linux and Unix servers, mainframes and proprietary mini computers.

A wide selection of applications and tools are supplied to ensure smooth functionality and seamless integration.

COMMUNICATION AND MOBILITY

Regardless of where and when, SuSE Linux Desktop allows you to work from the office, from home, or on the move via Internet and Intranet. Email can be created and edited in kmail, Microsoft Outlook*, Evolution, IBM Lotus Notes*, or other communications clients.

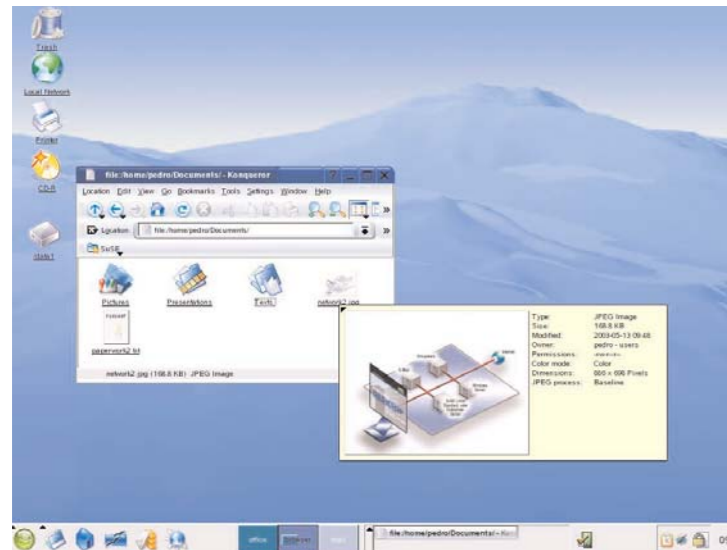

SUSE LINUX DESKTOP – SAFE AND SECURE

Security with Linux – tried-and-tested: easy to manage security functions, such as KDE desktop security system (Kiosk), provide guaranteed availability of all data, on mobile laptops and on the networks.

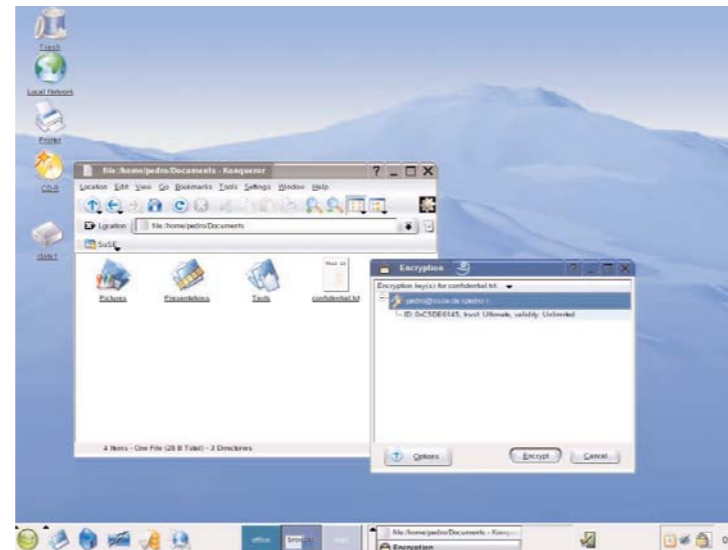

SuSE Linux Desktop provides easy encryption of all email and files at a click of the mouse in the file manager.

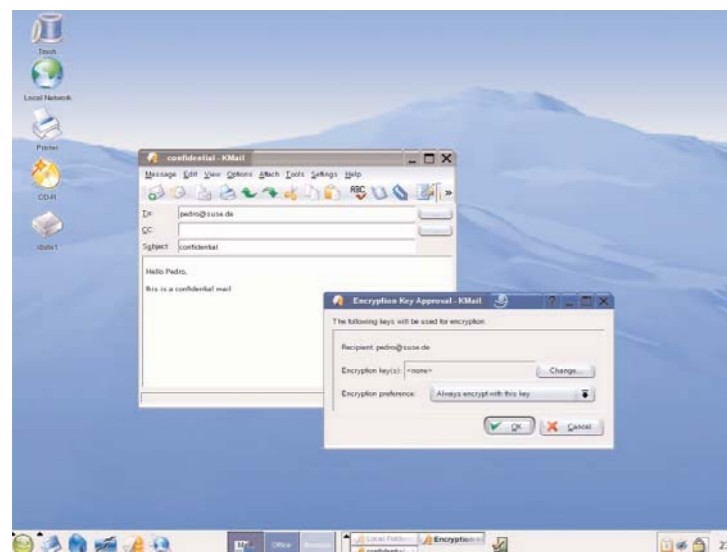

SUSE LINUX DESKTOP – FOR PROFESSIONAL ENTERPRISE USE

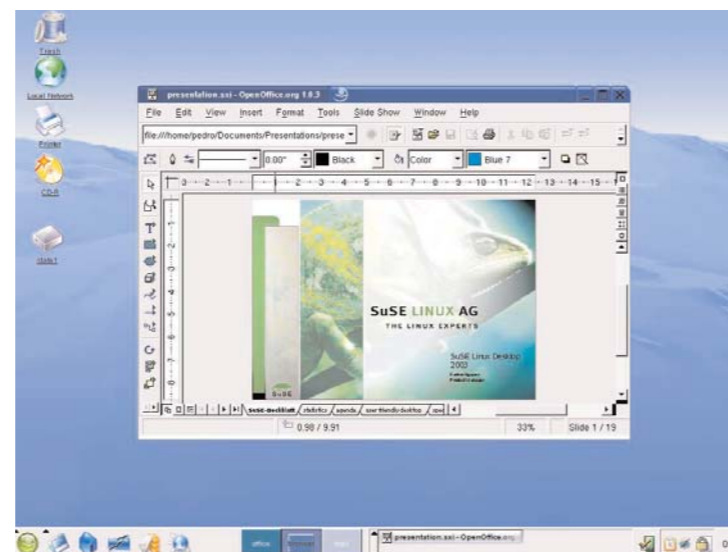

Quick view:
Efficient file management with Konqueror

Security:
Easy file encryption with the file browser

Mails – safe and secure:
Easy encryption of mails via mouseclick

Comprehensive Office functionality:
Trouble-free creation of complex presentations

ADMINISTRATION MADE EASY

Regardless of whether SuSE Linux Desktop is installed on 10 or 10,000 PCs: tried-and-tested SuSE administrative tools support the user during setup, configuration and management.
Stable, high-capacity, secure – the integrated operating system for SuSE Linux Desktop:

SuSE Linux Desktop technology is based on **SuSE Linux Enterprise Server**, a proven and extremely reliable server operating system for enterprises around the globe.

INTEGRATED SUSE LINUX OPERATING SYSTEM TECHNOLOGY:

- As Open Source software, SuSE Linux Desktop sets the trend for transparency, stability, and extensibility
- SuSE Linux technology has the maturity of time – in use successfully for over 10 years in Global 2000 companies around the world

SUSE LINUX DESKTOP – EQUALLY SUITABLE FOR LARGE AND MEDIUM-SIZED COMPANIES

SuSE Linux Desktop flexibility enables modular extension and porting of customer-specific solutions at any time.

SuSE Linux Desktop grows with the requirements and size of the company.

Qualified consultants and SuSE business partners support customers during migration and setup with the SuSE SmartClient Framework.

SuSE Linux Desktop is used by public sector organizations, as well as by medium-sized companies and enterprises alike.

SUSE LINUX DESKTOP – THE OPEN SOURCE, ALL-IN-ONE SOLUTION FOR WORK CENTERS:

SuSE Linux Desktop uses standardized protocols and Open Source tools – components are provided for all relevant client services, such as Internet, email, office, file, and print services.

SuSE qualifies and combines its own source code with those of third parties and provides them to Linux users with support and consulting services.

The greatest advantage of Open Source software is its vendor independence.

Users can have Open Source software maintained and extended by any qualified partner worldwide. There is no expiration date for Open Source software.

SUSE LINUX DESKTOP – FOR PROFESSIONAL ENTERPRISE USE

FAIR PLAY GUARANTEED FOR THE FUTURE

With the implementation of SuSE Linux Desktop you receive a professional, standards-based operating system that will stand the test of time – yielding a good return on your investment. You also receive an office package, a set of desktop applications, and a maintenance contract including access to the SuSE Maintenance Program for 12 months. The Maintenance Program includes access to all software updates without additional cost.

Make your own cost comparisons with a comparable operating system with support and an office package. You will see a faster return on investment with SuSE Linux Desktop.

LONG-TERM PROTECTION OF INVESTMENT

Migration of a workstation is most efficient when existing hardware and software can continue to be used.

We guarantee that SuSE-certified hardware and software (SAP, IBM, etc.) will continue to be supported and compatible with future versions of SuSE Linux Desktop, thus making the mandatory updates a thing of the past.

SuSE Linux Desktop is just as committed to supporting all open standards, including wide-ranging integration options with SuSE business products.

Existing Microsoft Office files and other data can be used on SuSE Linux Desktop thanks to our high-quality fonts and compatible applications.

MIGRATION AND COEXISTENCE WITH WINDOWS

Migration of Microsoft Windows workstations to SuSE Linux Desktop is efficient and cost-effective. Existing Windows workstations can be repartitioned, and SuSE Linux Desktop can be loaded alongside of Windows.

FINANCIAL FREEDOM THROUGH SUSE LINUX DESKTOP

Lower costs for procurement, operation, and maintenance of SuSE Linux Desktop allow companies with heterogeneous environments to provide users with a productive working environment. Office productivity can now be more easily extended to parts of the organization that previously have not been able to afford the investment due to high licence costs of other proprietary solutions.

High-performance and tested tools guarantee the successful transfer of many existing data files. Qualified partners and SuSE consultants support customers during migration and integration.

Participation in the further development of SuSE Linux Desktop enables long-term planning: Users continue to benefit directly from the further development of SuSE Linux business products. Participation in the SuSE Linux Maintenance Program means that improvements and enhancements can be installed via SuSE Maintenance Web and used immediately.

SUSE LINUX MAINTENANCE PROGRAM

Support any time, any place

A comprehensive portfolio of enhanced SuSE support and maintenance options ensure that companies receive expert support from SuSE Linux technicians. All this at fixed prices, with guaranteed response times and at all hours (optional).

Business customers benefit from the close cooperation between the SuSE Linux development team, SuSE business partners and from SuSE consulting, support, and training. This allows them to influence current developments in projects, courses and SuSE services.

SUSE LINUX AG – THE LINUX EXPERTS

Whether in private or professional life: over 15 million Linux users now appreciate the transparency and stability of the Linux system. Established companies of all sizes and from all sectors are putting their trust in the products and services of SuSE Linux AG.

These customers include T-Online AG, the city of Schwäbisch Hall, Debeka insurance, Oldenburgische Landesbank, EDEKA, Hensel, Lufthansa, Linde Kältetechnik, Miele, Sixt, and MTU Aero Engines among many others.
